

# NOTICE OF CONSTRUCTION

## The Meadowway Entrance Garden

Start Date: March 2024

Completion Date: July 2024

In partnership with the Garden Club of Toronto, Toronto and Region Conservation Authority is creating a pollinator garden in the Gatineau Hydro Corridor, within The Meadowway project.

Five gardens will be constructed and planted with native shrubs, grasses and wildflowers to support different types of pollinators including bees, birds and butterflies. A trail will be installed among the gardens to optimize access for trail users. This garden will increase biodiversity through the creation of habitat for native insects and wildlife, improving overall ecosystem health within the corridor.

Following the completion of the garden, wildflower and shrub plantings are planned for June 2024.

To ensure public safety during construction activities, please respect all posted construction signs and stay clear of work areas and equipment. Your cooperation and patience is appreciated.
