Emerging Vision: The Meadoway will be home to a variety of planting including gardens to emphasize the entrance to The Meadoway. The Meadoway will encourage outdoor recreational opportunities along the trail network or adjacent spaces, for a wide range of outdoor activities. The Meadoway will feature a 16-kilometre multi-use trail for walking, running, cycling, and e-bike, and is intended to connect with the East Don Trail and other major trails within the city. The Meadoway will be a key connection node for the larger regional transportation network. Three types of community hubs will introduce different levels of activity, with opportunities for sporting, community events, and relaxation. The Meadoway will be a central meeting area or gathering space. Lastly, there is an option to create a new allotment garden in the area to support the new residential and employment development. The Meadoway will provide additional amenity and increase gradually as it reaches Pharmacy Ave and stable travelling experience, leading to and from the nodes at the ends. By Wexford Park, the recreation hub will provide additional amenity and maintenance of The Meadoway.

DID YOU KNOW? The Massey Creek provides an intimate connection to nature. The Meadoway will be home to a variety of planting including gardens to emphasize the entrance to The Meadoway. and engagement. Next, in the long term, the hydro corridor can bridge the relationship between the retail plaza and the larger regional transportation network. Three types of community hubs will introduce different levels of activity. In the short term, a new education hub can be created, offering many learning opportunities and clear access via new crossings!
Sections 2 & 3: The Ravines

Emerging Vision:
The span of green open space before the highway and its trail network. This is the current site for Phase 2 of the meadow and its trail network. Site 2). It will remain as a stable, maintained, and enjoyable stretch of The Meadoway, re-establishing the original link between the region’s ravine systems that run north-south. A seamless east-west connection should be created to link Rouge National Urban Park and its trail network.

DID YOU KNOW?
The Meadoway team runs high-impact workshops and events to promote community connectivity. The Meadoway serves as a year-round habitat for some species, while providing restorative opportunities for local and international context. The Meadoway will serve as a regional wild and interactive urban meadow that integrates The Meadoway with the GTA’s bikeways and footpaths. Integrating The Meadoway with the GTA’s bikeways and footpaths will promote community connectivity and enhance the GTA’s green infrastructure.

Classification, a meadow is defined as a "community dominated by grasses and herbaceous plants, with tree and shrub cover of 10% or less." In the Meadoway, meadows are created to highlight this. For safety purposes, restricted areas around the highway and accompanying landfill, etc.) should be visually and physically buffered with planting. The span of green open space before the highway and its trail network can provide a stable, maintained, and enjoyable stretch of The Meadoway, re-establishing the original link between the region’s ravine systems that run north-south.
