

10 Goals for The Meadoway

- 1. The Meadoway will be a defining city-building opportunity for Toronto that can be celebrated among the most transformational revitalization projects in the world.**
- 2. The Meadoway will allow people to travel between downtown Toronto and Rouge National Urban Park without leaving the natural environment.**
- 3. The Meadoway will create active transportation links between parks, employment centres, and transportation hubs across Scarborough.**
- 4. The Meadoway will contribute to fighting climate change by creating important meadow habitat in a highly urbanized area, as well as reducing vehicle emissions by providing alternative commuting opportunities.**
- 5. The Meadoway will facilitate opportunities for urban agriculture by allowing local communities to grow their own food and build stronger community connections in the process.**
- 6. The Meadoway will build critical east-west connections for a ravine system that is geographically orientated in a north-south direction, lacking the east-west linkages required to maintain a strong natural system.**
- 7. The Meadoway will allow for scientific research on meadow habitats in urban systems, and will integrate citizen science opportunities to educate on the importance of environmental conservation.**
- 8. The Meadoway will be built with community contributions and active ownership to ensure that revitalization is maintained and effectively managed for generations.**
- 9. The Meadoway will operate as an inclusive, open, and evolving component of the natural system that represents the vision, passion, and diversity of the residents of Toronto and visitors from around the world.**
- 10. The Meadoway will represent a model to expand the revitalization to the over 4,200 acres and 500 kilometers of underutilized hydro corridors across the Toronto region.**
